About Insmed Incorporated

Insmed Incorporated is a biopharmaceutical company focused on the development of drug candidates for the treatment of type 2 diabetes and other metabolic and endocrine disorders associated with insulin resistance. The Company's lead product candidate, INS-1, is an orally active small molecule that restores insulin sensitivity to tissue. The Company is developing INS-1 for the treatment of type 2 diabetes and polycystic ovary syndrome, a significant women's health disorder. In conjunction to INS-1, the Company is developing SomatoKine®, a recombinant human protein that is targeted towards the management of both type 1 and type 2 diabetics who are less sensitive to insulin therapy.
