## About Insmmed Incorporated

Insmmed Incorporated is a biopharmaceutical company focused on the development of drug candidates for metabolic diseases and endocrine disorders. The Company's product candidate, INS-1, is an orally active small molecule that restores insulin sensitivity to tissue. The Company is developing INS-1 for the treatment of type 2 diabetes and polycystic ovary syndrome, a significant women's health disorder. The company's product candidate, SomatoKine®, is being developed as an insulin sensitizer and growth promoting/anabolic agent. The drug is the recombinant form of human insulin-like growth factor-I (IGF-I) and its regulatory binding protein, IGFBP-3. SomatoKine is currently in clinical development for type 1 and type 2 diabetes, and growth hormone insensitivity syndrome (GHIS/Laron Syndrome).
