Insmed Regains Full Compliance with Nasdaq National Market System Listing Requirements

Insmed Regains Full Compliance with Nasdaq National Market System Listing Requirements

GLEN ALLEN, Va., May 12, 2003 (BUSINESS WIRE) -- Insmed Incorporated (Nasdaq/NMS: INSM), a biopharmaceutical company engaged in the development of drug candidates for the treatment of metabolic diseases and endocrine disorders with unmet medical needs, today announced that it has regained full compliance with every continued listing requirement for The Nasdaq National Market.

On May 09, 2003, Insmed received a letter from the Nasdaq Listing Qualifications Panel stating that it had demonstrated full compliance with the Nasdaq Qualifications Exception issued to the Company on March 31, 2003. Accordingly, the Panel determined to continue the listing of the Company's securities on The Nasdaq National Market.

On April 24, 2003 Insmed Inc.'s common stock bid price closed at \$1.05 per share and since then the closing bid price has ranged from \$1.04 to \$1.36 for 12 consecutive trading days. To comply with the terms of the Exception, Insmed was required to evidence a closing bid price of at least \$1.00 per share for a minimum of ten consecutive trading days thereafter. The Company has complied with the terms of the Exception, and is now in compliance with every continued listing requirement for The Nasdaq National Market.

"We are pleased to return to full compliance status for continued listing on The Nasdaq National Market," said Dr. Geoffrey Allan, Chairman and Chief Executive Officer of Insmed. "We believe this is a direct result of the investment community's increased confidence in our potential to introduce our lead product candidate, rhIGF-I/rhIGFBP-3, to the market by the second half of 2004. Our strong balance sheet, with a cash position of over \$25 million, and a controlled burn rate, should provide us with the financial flexibility to meet this goal. We look forward to continuing to update our current and new investors on our progress as we work towards meeting this pivotal milestone for Insmed," concluded Dr. Allan.
