About Insmmed

Insmmed Incorporated is a biopharmaceutical company dedicated to improving the lives of patients battling serious rare diseases. Insmmed is focused on the development and commercialization of ARIKAYCE™, or liposomal amikacin for inhalation, for at least two identified orphan patient populations: patients with nontuberculous mycobacteria (NTM) lung disease and cystic fibrosis (CF) patients with *Pseudomonas aeruginosa* lung infections. Insmmed is also focused on the development of INS1009, the company's inhaled treprostinil prodrug for the treatment of pulmonary arterial hypertension (PAH), a chronic, life-threatening disorder characterized by abnormally high blood pressure in the arteries between the heart and lungs.
